

Brief CV

Prof. V. Ismael Águeda Maté.- Universidad Complutense de Madrid

Dr. V. Ismael Águeda Maté is Associate Professor in Chemical Engineering at the Complutense University of Madrid.

His research work has focused on the synthesis of materials and their application in catalysis to obtain products of high industrial interest, as well as in adsorption separation processes in both the gas and liquid phases.

He is co-author of more than 30 papers and book chapters in Chemical Engineering, supervised 3 PhD theses and participated in 35 research projects funded by different public agencies and companies. He is co-inventor of one patent and has registered the copyright for one specific software. He has carried out postdoctoral stays in prestigious international research centres such as the University of Bath, University of Porto and SINTEF in Oslo.
